

Environmental **OUR ENVIRONMENTAL POLICY**

In the development of all human activities for economic purposes (production of goods and services, supply of raw materials, etc.), it is necessary to interact in one way or another with the environment, either directly or indirectly, thereby consuming various natural resources that can cause changes or affect environmental components, to prevent these changes from producing a noticeable imbalance in the environment, it is necessary to have responsible environmental policies and procedures.

Logan Drilling Group is committed to implement actions that will help prevent, mitigate and compensate all negative environmental impacts generated in each of the countries where we operate by demanding maximum compliance with associated regulations in force, with the purpose of obtaining continuous improvement and better performance of procedures for environmental responsibility.
